Decoration TECHNIQUES

WHY DECORATE A GARMENT?

Textiles are a durable and powerful communication medium. Thanks to customisation, they reflect your brand identity and add long-term value to your products. Discover the main decoration techniques and their benefits.

WHICH DECORATION TECHNIQUE SHOULD YOU CHOOSE?

EMBROIDERY

Ideal for: a premium, elegant finish and to highlight a high-quality item. A raised effect stitched directly onto the fabric. Excellent wash resistance.

SCREEN PRINTING

Ideal for: large quantities, durable results. Ink is applied directly onto the fabric. Bright, long-lasting colours. The best value for money for high-volume orders.

DIRECT DIGITAL PRINTING

Ideal for: cotton garments and small production runs. Ink is sprayed directly onto the fabric by a specialised printer, giving a soft and smooth finish. Simple and flexible to produce: no pretreatment of the garment is required.

TRANSFER / FLOCKING

Ideal for: complex patterns and production runs. High-definition digital printing. Reduced technical set-up costs. Good reproduction of bright colours and gradients.

SCREEN-PRINTED TRANSFER

Ideal for: multicoloured logos on dark-fabrics. Allows very fine detail and provides excellent opacity. Suitable for technical garments, sportswear, and parkas.

DTF (DIRECT TO FILM)

Ideal for: small to medium runs with controlled costs. HD printing on film, heat-transferred onto the garment. Compatible with almost all textiles, delivering very fine details and colours.

REALITY TEXTILE

A PROFESSIONAL TOOL TO ENHANCE YOUR PROPOSALS

CREATE YOUR MOCK-UPS
IN JUST A FEW CLICKS TO
BRING YOUR PROPOSALS
TO LIFE.

FEATURES

EXPERIENCE THE PRODUCT IN 3D OR IN
AUGMENTED REALITY.

SA8000

Factory workers work hard. They should be able to work in a safe, pleasant environment. We're sure that's the case for us, as we comply with the world's strictest international standard on workplace conditions, the SA8000.

Trade with purpose

performance in the supply chain. It stands for 11 major principles:

- Workers' rights
- Fair pay
- Particular care with health and safety
- Special protection for young workers
- No forced labour
- Ethical business behaviour
- No discrimination
- Decent working hours
- No child labour
- No precarious employment
- Protection of the environment

AMFORI BSCI

Since 2003, amfori BSCI has been striving to improve social

NEUTRAL® RESPONSIBILITY

Instead of using conventional energy Neutral® products are manufactured using renewable energy. That way, Neutral®'s responsible behaviour helps reduce CO2 emissions and is beneficial for both the local environment and the global climate.

License no. DK/016/049

EU ECOLABEL

We process and reuse waste water and we reduce and recycle our waste.

We only use environmentally friendly dyes and are constantly seeking new ways to manufacture our clothes. We do all this in compliance with the strictest industrial requirements imposed by the European ecology label.

FAIRTRADE

Fairtrade Labelling Organizations International (FLO) is an organisation that connects fairtrade labelling initiatives in over 21 countries. The aim of the FLO and its members is to promote and facilitate fair trade in the global North in order to enable the sustainable development of marginalised producers in the global

South. Fair trade is a system of exchange that aims to achieve greater fairness in conventional trade. It works by using trade as a lever for development and reducing inequalities, ensuring that producers are remunerated fairly. In addition to the economic aspect, fair trade also involves ethical, social and environmental concerns.

OEKO-TEX® Standard 100

OEKO-TEX® is an internationally recognised independent testing and certification system for textile products. It certifies that both raw and intermediate materials and finished products contain no substances that might be harmful to man or the environment at any stage of production. Test criteria are standardised throughout the world and refer to pH, pesticide use and heavy metals.

Criterion no. 5: monitoring of the business's energy consumption. This criterion was introduced in 2010 with the aim of making printers more aware of how much energy they consume. To do this, the company must set up quarterly monitoring of its energy consumption and submit the readings every time they renew the label.

12 PRINCIPLES

WRAP (Worldwide Responsible Accredited Production)

WRAP is an independent, non-profit organisation dedicated to promoting and certifying lawful, humane and ethical manufacturing all over the world.

Created in 2000, WRAP is the world's largest environmental and professional certification

programme for the labour-intensive manufacture and processing of consumer products. WRAP is supported by 25 international trade organisations, including the International Apparel Federation. WRAP's principles cover basic standards and good professional practice, factory conditions, customs compliance and compliance with environmental standards. There are 12 principles:

- Compliance with Laws and Workplace Regulations
- Prohibition of Forced Labour
- Prohibition of Child Labour
- Prohibition of Harassment and Abuse
- Compensation and Benefits
- Hours of Work
- Freedom of Association and Collective Bargaining
- Health and Safety
- Prohibition of Discrimination
- Environment
- Customs Compliance
- Security

ORIGINE FRANCE GARANTIE

certification is awarded by an independent certification body. Checks are then carried out every year to ensure that the product is 100% made in France and that at least 50% of the product's manufacturing costs (including raw materials) are of French origin.

SEDEX

SEDEX is a worldwide membership organisation that makes doing business easier, for everyone's benefit.

Sedex hosts the biggest collaborative platform dedicated to sharing data about supply chains and responsible purchasing. It is used by over 50,000 members, in over 150 countries.

Tens of thousands of businesses use Sedex to manage their performance in terms of employment law, health and safety, and ethical trade.

Members use their services to access many types of data, standards and certifications, so that they can make informed commercial decisions and ensure continuous improvement in their value chains.

PETA APPROVED VEGAN

Peta Approved Vegan is an international certification regarding the well-being of animals. It is managed

by PETA (People for the Ethical Treatment of Animals), an international non-profit charitable organisation dedicated to establishing and protecting the rights of all animals. The label can be found on clothes, shoes and accessories. It guarantees that the products have not been tested on animals. Obtaining the label does not require an audit by an independent verification body. It is awarded on a self-declaration basis, and the manufacturer pays to be allowed to use the label.

FAIR WEAR FOUNDATION

The Fair Wear Foundation is an independent multi-stakeholder organisation that works with clothes brands, garment workers and influential industry members to improve working conditions in the garment industry.

Catalogue made from recycled paper

Criterion no. 1: compliant destruction of hazardous waste. To meet this first requirement, printers must have all waste collected and destroyed by approved collectors in compliance with regulations. • Criterion no. 2: safe storage of hazardous liquids. To meet this second requirement, printers must ensure that all new hazardous liquids and liquid waste are stored safely and securely, whether or not they are currently in use. • Criterion no. 3: no use of toxic products. To meet this third requirement, the company pledges not to use any products labelled as toxic ("skull and crossbones" symbol). • Criterion no. 4: awareness programme for staff and customers. Companies are requested to set up a specific in-house communication programme about Imprim'Vert® in order to ensure that all employees are aware of the issues involved. For companies whose main activity is digital printing, in-house environmental awareness actions must be introduced to raise customer awareness. •

PEFC - Programme for the Endorsement of Forest Certification (PEFC) is a private forestry certification system that promotes sustainable forest management. PEFC is the world's leading forest certification system as regards actual area of certified forest and also the world's leading source of certified wood. PEFC certifies sustainable 10-31-1601 forest management and unites people of forests in 53 countries, all over the pefc-france.org world. For 20 years, PEFC France has been working to achieve a balance between the environmental, social and economic aspects of forests, through pledges to practise sustainable forest management from 70,000 forest owners and over 3,100 companies in France.

LE TRIMAN - Since 1st January 2015, the TRIMAN logo has been the reference in France for showing that a product can be recycled. Unlike the Point Vert green arrow, it tells consumers that the packaging is subject to recycling rules. The logo can be put on different types of products as well as on packaging or instruction leaflets. It can also be displayed in shops or on websites featuring the products in question.
